

TRANSFORM DATA INTO BETTER FARM MANAGEMENT

Agellum® is a comprehensive farm planning and management tool to help achieve success in the field. It transforms unique data into insights that help make better decisions and take farming operations to the next level. The accessible yet sophisticated system from CHS collects data and analytics through a centralized platform. Agellum is built to help identify opportunities to maximize productivity and profitability.

A fully-integrated, centralized farm planning and management tool.

A software system with the capability to absorb and manage big data all in one place.

24/7 accessibility via web browser and mobile, resulting in real-time collaboration that enhances agronomy and business decisions.

Harnesses the collective power of precision agriculture, agronomic insights, sustainable practices, data and analytics.

ACCESS THE POWER OF AGELLUM AT MYCHSINC.COM
