

Canola Products Offerings

Connected to CHS Inc.

As a farmer-owned cooperative, CHS connects growers to consumers around the world. We purchase grain from a network of cooperatives and farmer-owners and match it with the needs of domestic and global food and feed customers in 65 countries. CHS also manufactures and distributes a variety of Cenex® brand energy products and offers crop inputs through wholesale and retail operations in more than 450 communities in the United States to help farmers grow healthy, profitable crops.

Canola Oil Products

Located in the heart of North America's canola production is the CHS Hallock facility, a canola processing plant. CHS is proud to provide support to farmers producing quality canola. The state-of-the-art canola crushing facility in Hallock, Minnesota produces the following food, feed and fuel products:

- Refined canola oil used by food companies throughout the U.S.
- Quality canola meal
- Additional byproducts like canola distillate and soapstock
