

AVENTINE™

Starter Fertilizer Enrichment

- Aventine will assure the crop achieves its full yield potential.
- Aventine contains a blend of key nutrients which helps supplement a starter fertilizer program minimizing these key nutrients from being yield limiting factors.
- Aventine is most beneficial when a condition exists that is hampering the availability or uptake of a particular nutrient.
 - Low organic matter/sandy soils
 - Cool/cold soil conditions
 - Stressed soils (saturated or droughty)
 - High pH
 - Excessive phosphorus
 - Excessive rainfall event in spring
- Aventine is formulated with the highest quality ingredients available.
- Two quarts per acre of Aventine delivers one quart per acre of a fully chelated 9% zinc.
- Aventine is compatible with most polyphosphate and orthophosphate fertilizers and is compatible with other fertilizer additives such as Ascend®, Avail® and PMax®.
- Analysis: 4-0-5-3S-4.5Zn-1Mn-0.5B
 - Typical use rate with starter fertilizer program is 2 quarts per acre.
 - Package Sizes:
 - 2x2.5 gallon case
 - 275 gallon
 - Bulk

Always read and follow label directions prior to use.
